TUNER

Horsepower. Torque. Speed. You can have it all, with Osiris Standard. Whether you're a professional racer, backroad warrior or a daily driver, Osiris Standard has your ECU tuning covered. Your vehicle will be tuned to perfection, with the most power and performance available for your Nissan or Infiniti's custom modifications, in a DIY package. Push the limits of your vehicle with an impressive, professional-level of customization designed to get your ride ready for action, in less than 60 seconds. Easily connect the Osiris cable to your Windows-based PC for a loaded pre-tune on your Nissan or Infiniti, that'll blow your mind every time you have a need for speed. When you're ready to make a tweak that requires a new tune, just let us know. UpRev (or an UpRev ProTuner) will create a new custom tune, and email the files straight to you -- up to three (3) eTune updates.
